## Valued over \$170,000

# DESIGNED TO BE TOUGH. BUILT FOR ADVENTURE

**O**ur Phoenix range of canopies all have custom and innovative features designed to eliminate some of the more frustrating aspects of touring and exploring our great country by road.

At the heart of all our product offerings lies **HDPE** (or *High-Density Polyethylene*) a product primarily used in marine construction until now. **Hard, strong, flexible and tough**, we have developed a patented method of welding the product to suit our specific requirements.

Our products stand up against aluminium and fibreglass, in terms of performance and aesthetics, and form the foundation of our business.
