Doors for sale

My name is Kim Chipper and I was a funeral director for 38 years (1969 to 2007). I took over the business of Chipper & Son Pty Ltd, formerly Donald J Chipper & Son Pty Ltd, before that it was D J Chipper Furnishing Undertaker, a business started by my grandfather on 10 June 1889.

In 1990, Karrakatta Cemetery said they were going to demolish the current crematorium, built in 1937, and build a new one in its place in 1991. I asked if I could buy the doors and skirtings. I wanted to build a large farm house on 20 acres my wife and I owned in the Ferguson Valley. Unfortunately the plans fell through and we were left with all the doors. They've been in storage since.

TENDER IS ACCEPTED: WORK STARTS ON MONDAY

The Karrakatta Cemetery Board has accepted the tender submitted by Mr. O. Doran for the construction of a brick crematorium.

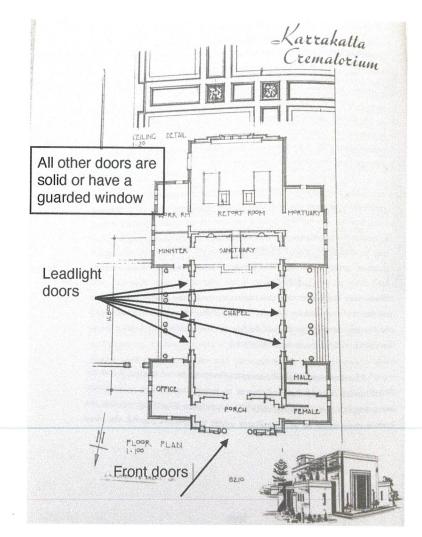

In announcing this today, the secretary (Mr. L. T. Boas) disclosed that the amount involved was £6329.

Twelve tenders were received for the work, prices ranging from £6329 to £7500.

Construction will begin on Monday next and work should be completed by December 1

The building will have a frontage of 54 feet and a depth of 65 feet, and will include a chapel, sanetuary, orfice, ministers' room, transformer room, mortuary and other accommodation.

Its design follows modern trends, but is based on classical lines. The architect is Mr. R. Summerhaye.

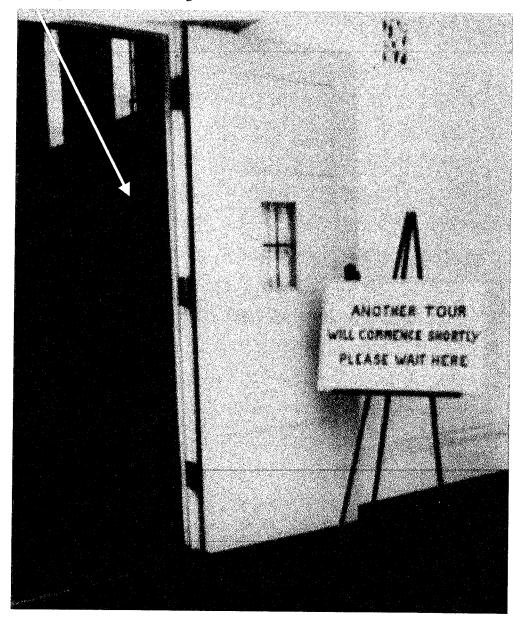

Excerpt from:Sunday Times (Perth, WA) Sun 5 Dec 1937, Page 5

The main portion of the building in Mr. Summerhay's winning design will be the chapel 48ft. from east to west by 37ft. 3in. from north to south. The eastern end of the chapel will be occupied by the sanctuary, on a dais, with a catafalque in the centre marking the head of the room. It will be approached from the main entrance at the western end by a porch, off which will be an office 17ft. by 12ft. on one side, and conveniences on the other. On both sides of the chapel will be lofty windows and glass doors leading to the loggias, where people who cannot be accommodated in the chapel may follow the funeral services.

The main portion of the building in Mr. Summerhayes's winning design will be the chapel, 48ft. from east to west by 27ft. 3in. from north to south. The eastern end of the chapel will be occupied by the sanctuary, on a dais, with a catafaique in the centre marking the head of the room. It will be approached from the main entrance at the western end by a porch, off which will be an cffice, 17ft. by 12ft. on one side, and conveniences on the other. On both sides of the chapel will be lofty windows and glass doors leading to the loggias, where people who cannot be accommodated in the chapel may follow the funeral services. From the loggias the people will be able to step down into the columbarium gardens, surrounded by the niche walls and with a pond in the centre of the space. Doorways on each side of the sanctuary will lead respectively to the ministers' room (12ft. x 10ft.) on the left and the mortuary (24ft. by 10ft. 6in.) on the right. An opening will be pro-
